

## From the clients

"The scar is no longer as tight or itchy as it was before treatment.

The scar is smoother and sometimes I might even forget it exists because I don't feel it the same way I did before treatment."

**-C-section scar patient**

"During LymphaTouch treatment, you can immediately see the swelling go down and relax the entire upper limb, making it painless."

**-Breast cancer survivor**

"My jaw joint and neck movement improved. Feels much softer and not so sore."

**-Patient with chronic bruxism**

# LYMPHA TOUCH<sup>®</sup>

**NEGATIVE PRESSURE TREATMENT**

## Benefits of LymphaTouch

### Painless treatment

The adjustable negative pressure makes the treatment comfortable and effective.

### Reduces swelling

Clear results can be achieved in just one treatment.

### Relieves pain

Studies have shown that the treatment helps with pain and discomfort.

### Relaxes muscles

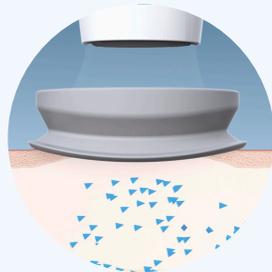

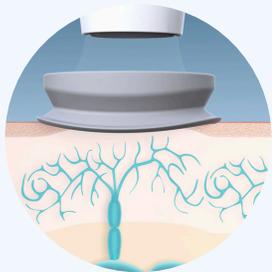

Negative pressure and mechanical vibration is a pleasant combination for muscle relaxation.

### Softens scars

Negative pressure is a gentle treatment for tight and tense scars.

## How does LymphaTouch work?

LymphaTouch combines negative pressure and mechanical vibration to enhance lymphatic drainage and blood circulation and to treat soft tissues.

## Treatment Areas

### Soft Tissue

- Neck and shoulder tension conditions
- TMD symptoms
- Muscle tension and range of motion restrictions

### Scars

- Surgery and trauma scars
- C-section scars
- Fresh and old scars

### Swelling

- Swelling after surgery or injury
- Chronic swelling
- Pregnancy related swelling
